Introduction

This section focuses on scholarly journals and popular magazines about and/or from Latin America, published either in English or Spanish or both. Covering huge geographical and cultural areas, these titles are published worldwide, ample evidence that there is a global interest in things Latin American. The academic titles are concentrated in the social sciences and humanities—disciplines that have traditionally focused on Latin American Studies. While some of the titles included are not comprehensively indexed, most are indeed indexed in a variety of sources, including electronic databases, such as the Hispanic American Periodicals Index. This list is not intended to be comprehensive; rather, it should serve as a guide in developing library collections relevant to this area.

Tackling such a large region has been challenging. We have attempted to include representative titles from throughout Latin America, but we have emphasized inclusion of materials that are readily available in the United States. Rather than focus on a particular country, most titles cover either a region of Latin America, such as Central America or the Caribbean region, or more broadly, the entire Hispanic world. Ordering titles directly from publishers in Latin America can prove to be a slow, cumbersome process. Therefore, we strongly suggest that selectors of Spanish-language periodicals and other materials find vendors or distributors that are willing to help identify and provide titles that are readily available.

Electronic Journals

The Internet is becoming a more established source of information on Latin America and Latinos in the United States. An increasing number of journals and newspapers are available electronically. They are not included in this section because they are available in paper format as well. Do not be deterred by the low numbers of entries below. Retrieving information about journals and newspapers from the Internet can be a challenging but rewarding undertaking. A vast amount of information is available for those who have access to the technology and are willing to try.

One efficient way to search for this information is through mega-sites such as the Latin America information server at the University of Texas at Austin. This site (known as LANIC) provides a gateway to information about Latin America, including information about journals, magazines, and newspapers. Other specialized directories are available as well. What one will find at these sites will vary. For some titles the user will find the full text of the current issue of a magazine or newspaper; other sites will provide only subscription information; others will offer the tables of contents for current and occasionally for past issues. In general, the titles available on the Internet tend to cover business and current-events themes. Magazines for the general public are in abundance as well. Examples of such mega-sites are the Latin American Network Information Center (LANIC) (lanic.utexas.edu), electronic journals from the WWW Virtual Library (www.edoc.com/ejournal), and the Association of Research Libraries Directory of Electronic Journals, Newsletters, and Academic Discussion Lists (arll.cni.org/scomm/edir/index.html).

Introduction

The authors have chosen to use "Latino Studies" as the title for this section of *Magazines for Libraries*. We define Latinos, now the country's largest group, as including Puerto Ricans, Americans of Mexican descent, Cubans, and others from throughout Latin America and the Caribbean who now make the United States their home. (For information on magazines from and/or about Latin America, please see the Latin American section.)

Included in this section are all types of popular magazines and scholarly journals that focus on the Latino experience in the United States. While the list is small, that is partly because we have limited inclusion to magazines, journals, and a select number of online publications. If one adds the number of newsletters, newspapers, and other online sources available that are by or about Latinos, one can come up with a nice-sized list of reading material.

Unfortunately, the list could still be longer. While there do exist magazines and journals that have longstanding publication records and are still in business, many new publications only manage to survive for short periods of time. Librarians whose job it is to build collections on Latinos need to keep a vigilant eye out for new publications, as the number is bound to increase with the increasing size of the Latino population.

Those selecting information and recreational materials needed by Latinos should also supplement collections with local sources in their region. Reaching out to the community and assessing its needs will provide a more accurate picture of what materials to purchase. This is especially true for the Latino population because of its great diversity. Within particular communities there are local newsletters and newspapers as well as publications by special-interest groups. In addition, there are several Spanish-language newspapers that cover various regions of the United States: *La Opinion*, published in Los Angeles; *La Prensa*, in San Diego; *El Hispano News*, in Albuquerque; *El Nuevo Herald*, in Miami, and *El Diario*, in New York. These well-known newspapers cover issues and topics of interest to the Latino community as well as national and international news. A newspaper from the local vicinity would be a valuable addition to individual library collections and might attract new readers. (For more information on these types of resources, see Guereña et al., *Latino Periodicals: A Selection Guide*.)
